

Position: Senior Traffic Signal Technician

This job is for a traffic signal technician to maintain all traffic/emergency signals and associated components along the US-1 corridor in Monroe County (Florida Keys) & the City of Keys West; approximately a 102-mile stretch. Vehicle and gas card provided.

This position will require the candidate to be proficient in the traffic signal operations and maintenance. This includes a thorough understanding of traffic signal components including installation, replacement and troubleshooting of traffic signal systems. Additional requirements below:

- Be able to assemble and integrate an entire traffic signal cabinet system
- Understanding of traffic signal controllers from 170 to 2070LX
- Video detection system
- Understand the traffic signal infrastructure including pedestrian poles, uprights, mast arms and configuration
- Electrical background
- IMSA level II (minimum) if only level I we are more interested on the experience
- Conduct preventive maintenance services to traffic signal intersections (including aerial and ground level). This will require the use of a bucket truck
- Knowledge of Microsoft Office (Excel and PowerPoint – does not have to be an expert)
- MOT certified
- Bucket Truck operation
- Willing to relocate to the Keys (preferable Marathon)
- Will spend a lot of time on his/her own
- Also must be able to adapt to ITS maintenance needs if required and work with others.
